

Guide

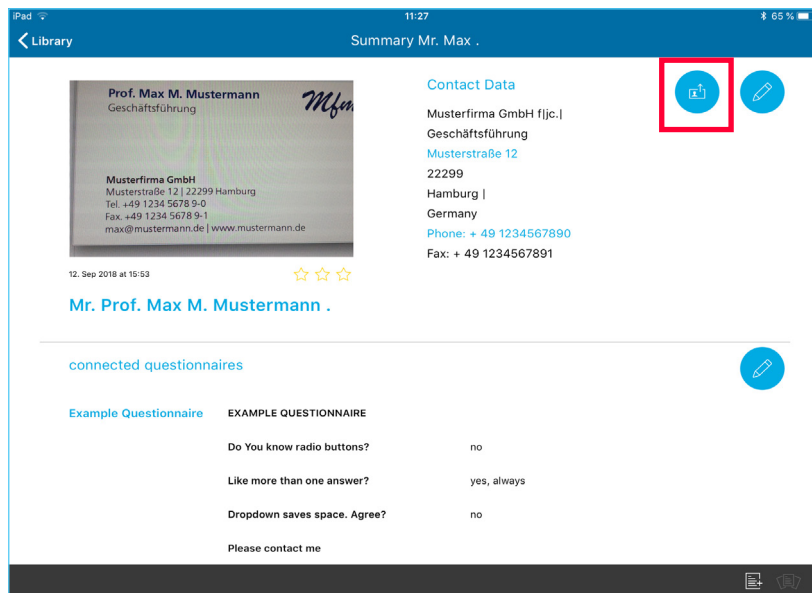

How to save Leads in the Contacts App

Quick-Guide

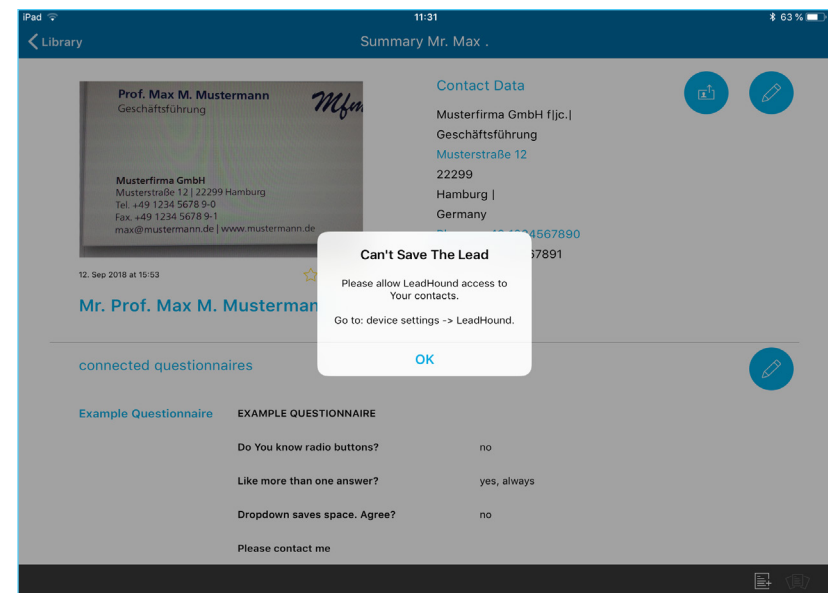

1. Open the Lead you want to save in your Contacts App
2. Click on the left icon in the upper right corner
3. Allow LeadHound to access your Contacts. If you have done that already proceed with step 8
4. Go to your device settings
5. Scroll down until you see LeadHound and click on it
6. Allow Leadhound to access your Contacts and go back into the LeadHound App
7. Click on the left icon in the upper right corner once again
8. Click OK
9. The Lead is now also saved in your Contacts.

Guide

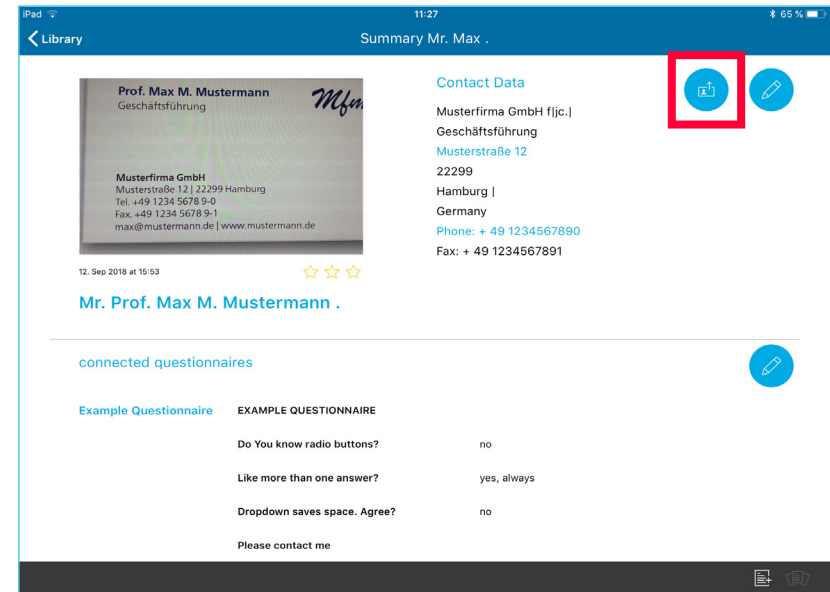

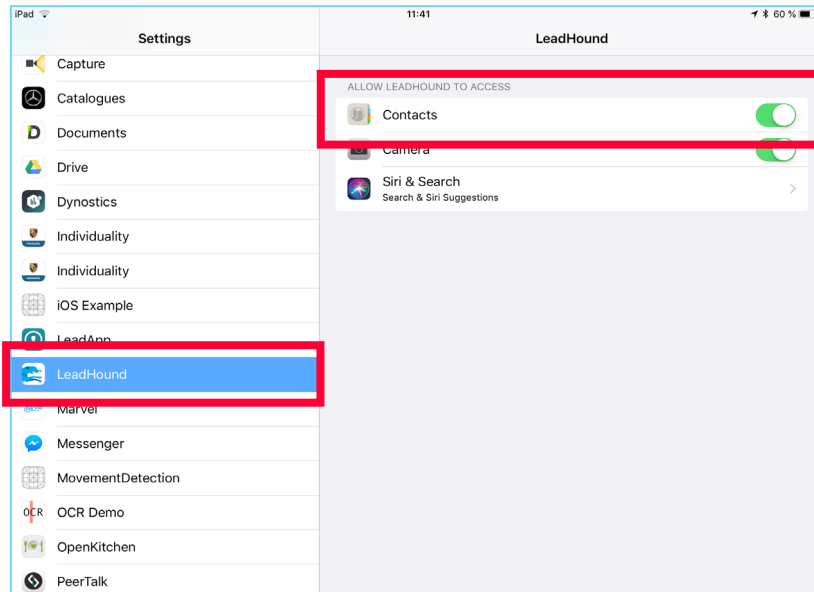

1. Open the Lead you want to save in your Contacts App
2. Click on the **left icon** in the upper right corner

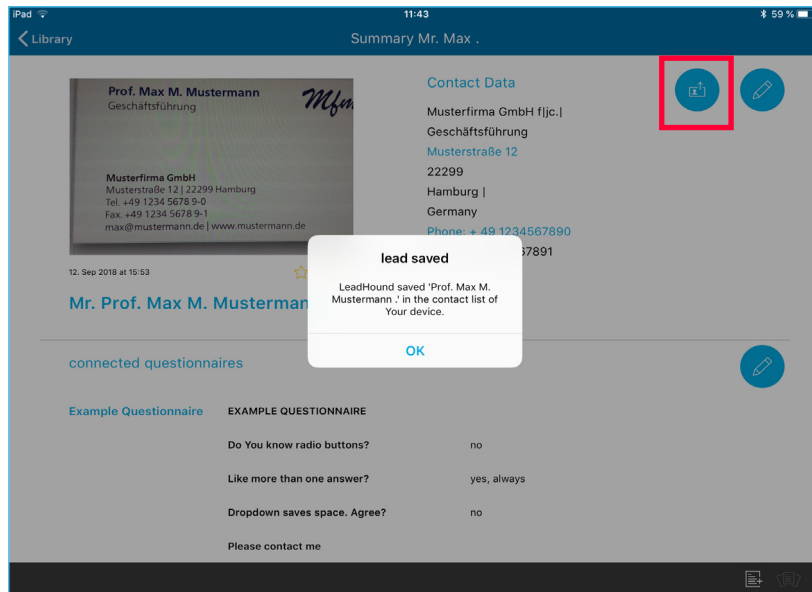

3. Allow LeadHound to **access your Contacts**. If you have done that already proceed with **step 8**

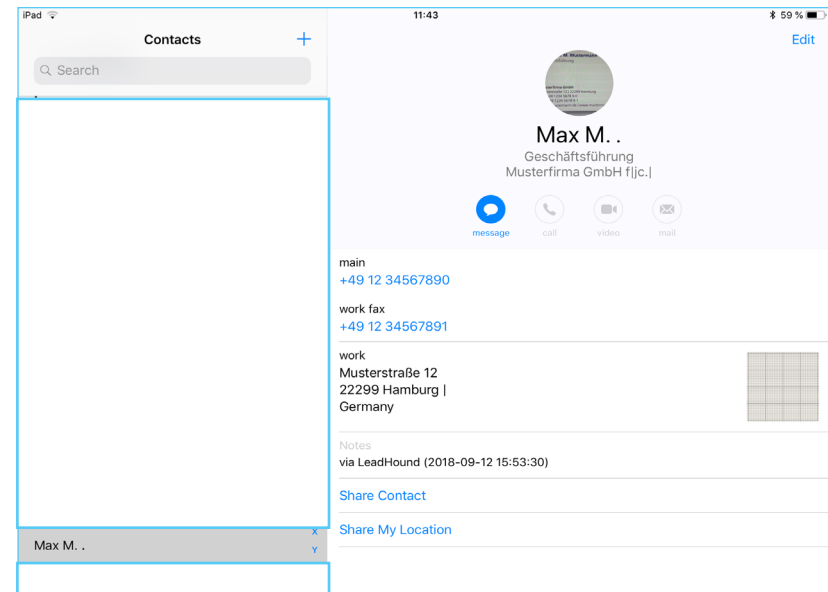

4. Go to your **device settings**
5. **Scroll down** until you see LeadHound and click on it
6. **Allow Leadhound to access your Contacts** and go back into the LeadHound App

7. Click on the **left icon** in the upper right corner once again

8. Click **OK**

9. The Lead is now also saved in your **Contacts**.

More questions...

The icon is missing on my App - what now?

This function is only available in the trial version. If you want to use it in the full version approach your LeadHound contact so they can unlock it for you. You will be able to find the icon, then.

Nothing happens when I click on the icon, why is that?

Your contact needs a name and a surname so it can be saved into your Contacts.

Can I share the contact with others?

You can share your contacts by synchronizing them with iCloud. The person or device you want to share it with has to use the same Apple-ID as yours.
